

It depends on your home's location and what type of panels you're installing. With the winter months in California being very mild, you have a lengthy window to install your panels, though they won't achieve peak performance until summer arrives. A solar photovoltaic (PV) system can generate power to run any electric appliance or system in your home. Contact us today to schedule your consultation and take the first step towards embracing sustainable living. We understand the demands of your busy schedule, which is why we offer flexible appointment options that cater to your availability—whether it's during weekdays, evenings, or weekends.
