

In the short matter of a century and a bit, the motor car has shown itself to be one of the world's greatest inventions. Karl Benz could not have known that his Benz Patent Autowagen would lead to vehicle transport as we know it today. Not just cars but pickups, SUVs, crossover vehicles, Titan Rise Health trucks and much, much more. We truly would be lost without them, wouldn't we? And they are complex beasts! That's for sure. Even those early vehicles! Even though they are nothing like today's vehicles, they were fairly complex in their own way. And today, modern cars have extremely complex engines which are all powered by computers to ensure they run as efficiently as possible, each and every time they are started. It is filled with questions about cars, the men and companies that made them. It also has a few questions about their inner workings! Think you can ace this? Let's see, shall we! Incredibly, this is true.

external frame And the man behind it? Ferdinand Porsche. The vehicle was called the Lohner-Porsche. The final version had an electric motor in each wheel with a gasoline-powered generator used to charge them. Formed by Gene Haas in 2015. Haas F1 made their appearance for the first time in the sport of Formula 1 in 2016. They are the first American team to enter the sport since 1986. To date, they have yet to win a Grand Prix. Name the part of the car that helps get the power from the engine to the wheels to turn them? Sometimes called a propellor shaft, the drive shaft rotates thanks to the power produced by the engine. It is connected to the back or front wheels and this rotation helps to turn them, pushing the vehicle forward. Which vehicle did his character drive? Although the P1800 came out as a sports car in a two-door coupe style, strangely, a 3-door sports estate was also released.

More than 39,000 coupes were built. Name the Alfa Romeo mechanic who started the Italian sports car manufacturer, Ferrari. Enzo Ferrari started the Ferrari company in 1947. Not only did they build sports cars, but Enzo understood that by racing in the Formula One series, he could market his cars. Over the years, Ferrari has been one of the sports' most successful teams. The Ford Mustang is a true American classic. But it was almost called something else. Pick the right answer below. Luckily they stuck with Mustang, right. Other names that Ford considered included Cougar, Avventura and Torino. Cougar was eventually used on a Mercury model while Ford used Torino a few years later. Just how many were manufactured? That's right. From 1907 to 1928, 15 million Model Ts were made. And the interesting thing is that as Ford began to manufacture them faster, thanks to production lines, the price of the vehicle went down significantly. A racing series similar to Formula One but with electric powered cars first made an appearance in 2014. Can you name it?

Introduced in 2014, Formula E sees teams racing cars with electric motors. As these motors don't last the length of the race, a car change happens during the event. Formula E is the brainchild of Alejandro Agag and features many ex-Formula 1 drivers. What vehicle manufacturer do you associate with Ransom E Olds? One of the earliest auto manufactures in the United States, Ransom E. Olds started the Olds Motor Company 1897. After producing more than 35 million vehicles, the company was closed in 2004. What is it? One of the most famous brands of the Corvette is the Mk II Stingray, produced between 1963 and 1967. This classic had either a 2-speed automatic gearbox or 3-speed manual with a range of engine options, including small and big block V8s. Which of these is considered to be the first real muscle car, although it wasn't really known at the time. Many muscle car aficionados call the Chrysler 300 the first muscle car.

No matter if you agree or not, the 300, introduced in 1955 and produced until 1965 certainly had the cool factor and the big V8 engine to match. When Ford produced its 300 millionth car, what model did they choose to make it? It had to be a Mustang, right! While the Model T it simply is the most iconic Ford ever built, the 300 millionth car was a Mustang GT convertible. It too was celebrating 40 years of the Mustang brand. Enzo Ferrari worked as a mechanic for Alfa Romeo before starting his own business in 1947. Interestingly, the first Ferrari model was built in 1940 but the company only formed seven years later. Today, it is recognized as one of the top brands in the world and not just in the field

of motoring. The movie, "Iron Man", released in 2008, saw Tony Stark drive which make of car? This mid-engined two-seat sports car was first marketed by Audi in 2006. It is available as a coupe and convertible and uses Audi's all-wheel-drive system.
