

Many homeowners start [researching solar companies](#) because they want to lower long-term energy costs and understand what a home solar project might look like. A good starting point is to look at energy use, roof conditions and long-term goals for the home. Homeowners often compare system size before moving forward. It also helps to understand how permitting and interconnection affect project timing.(Image:

https://homeinsulationbusinessroundup.weebly.com/uploads/1/4/9/1/149181504/loft-insulation-scaled_orig.jpg) Some households want battery backup for essential loads, while others focus mainly on reducing utility costs.(Image:
